

MEG-111 Earth Resistance Meter

Overview:

MEG-111 is a three poles earth resistance tester that measures the electrical resistance of the earth electrodes with an acceptable accuracy and within a few seconds.

The wide range of measurement, the user friendly operation and the durability of the device makes it a perfect choice for both the experts and the once in a while users.

MEG-111 is widely used in the building construction industry, electrical engineering, educational purposes, etc.

Features:

- Ground resistance measurements from 0.01Ω to 2000Ω with 0.01Ω resolution
- Data hold, low battery warning
- Complete with test leads, auxiliary earth bars, heavy duty case and six 1.5V batteries

Parameter	Values
Earth Ground Resistance	0/20/200/2000 Ω ±(2%+3)
Earth Voltage	0 ~ 30V ±(3%+5)
Resolution	0.01Ω
Data Hold	yes
Working LED Indicator	yes
Function Symbol Display	yes
Low Battery Warning	yes
Power supply	AA1.5Vx6(UM3)
Product Size	150(L) x 100(w) x 70(H) mm
Product Net Weight	approx. 680g
Standard individual packing	Carry case
