Advanced Panorama Function

This unique function allows you to conveniently piece together normal sized images to create one large image for a wide angle view of the area being measured. The FLIR B400 has an on-screen guide to assist in aligning multi-image captures before using FLIR BuildIR or Reporter Software to create a panorama picture.

METERLiNK frees the Thermographer from the manual process of collecting field data

Infrared cameras quickly locate moisture related problems

Collecting moisture readings on damaged surfaces and associating them with regions on an infrared image can be a complicated and cumbersome process

Manual data collection is time-consuming and prone to errors. METERLiNK eliminates this problem by allowing the thermographer to quickly take moisture readings on a damaged surface and associate those readings with the corresponding targets stored in an infrared image

Software Packages

QuickReport™ PC software enables users to Organize, Analyze and Create Reports with FLIR Cameras.

FLIR BuildIR Software package specifically designed to carry out advanced analysis of building structures. It is used to analyze images taken with an infrared camera, and create inspection reports based on these images.

FLIR Reporter Ver. 8.5 is a powerful software for creating compelling and professional, fully customized, easy-to-interpret reports in a standard MS Word Document. You can create a report by simply Dragging and Dropping your images on a desktop icon or using the Wizards to guide you step-by-step through the process. The saved document is a 'live' report with full access to the analysis tools and temperature measurement data. The reports can be multi-page and include all of your IR inspection data -infrared and visual images, temperature measurements, voice comments and text notes.

FLIR ThermaTrak™
If your IR camera is lost or stolen, ThermaTrak can help you track where it is.

Applications

Water Damage — Water leak on ceiling, gutter, and roof top Insulation — Energy Loss, Home Inspection, and HVAC
