

## **Reliability plus flexibility**

Designed for use with BW Technologies by Honeywell single and multi-gas detectors, the BW Technologies by Honeywell Sampler is a motorized pump that allows remote sampling capabilities to be added to any BW Technologies by Honeywell diffusion instrument. The Sampler is an excellent choice for a multitude of applications and industries, including pre-entry and continuous confined space work. Available as its own kit, or as part of a Confined Space Kit with any compatible instrument.

- Quick and easy compliance - automatically maintain accurate records
- Sample gas from remote locations
- Leak test ensures clean and proper draw
- Easily compatible with all BW Technologies by Honeywell diffusion units
- Continuous self-test ensures proper functionality
- Up to 30 hours of continuous operation on a single set of AA alkaline or rechargeable NiMH batteries
- Built-in water trap and particulate filters
- Manual flow block test at start up verifies performance
