

Key Features:

Source and measure 7 RTD type devices (PT10, PT50, PT100, PT200, PT500, PT1000(385), PT100(JIS)) or
Large 5 digit LCD with full angel
High accuracy maximum up to 0.2°C and 0.1
With Standard jack for external power supply

The pc720 RTD(Resistance Temperature Detector) Calibrator is a precision source and measurement tool for calibrate RTD instrument.

SPECIFICATIONS:

RTD Type: PT10, PT50, PT100, PT200, PT500, PT1000(385), PT100(JIS)
Measuring and Simulating RTD
Temperature Resolution: 0.1°C or 0.1°F
Resistance Resolution: 0.1
Temperature Accuracy: $\pm 0.2^{\circ}\text{C}$
Resistance Accuracy: ± 0.1
Range : 0.00~3200.0 or -200.0~630.0°C

Accessories included:

- Free DC 1.5V (AAA) BatteryX6
- Free Protective bag
- 2 test lines, 2 Crocodile jacks
- User Manual

Standard jack for external power supply
